

Thank You

Thank you for ordering brackets from ExtendMySeat, the automotive solution for more leg-room, more comfort and better driving.

Inventory in Box:

- 3 - ExtendMySeat brackets
- 4 - Black 3/8 bolts

What you will need for assembly:

- 1 - Socket wrench
- 1 - Metric 14 socket

STEP 1

Remove the three ExtendMySeat brackets from the package and locate the four black 3/8 bolts provided.

STEP 2

Go to the front seat and remove the two plastic caps (remove by pulling clockwise). Then, use a socket wrench to loosen the two front factory bolts.

STEP 3

Now slide your seat all the way to the front and go to the rear seat. Remove the two plastic caps, locate and remove the two rear factory bolts. (Note: the factory seat is not secure)

STEP 4

Locate the two identical front ExtendMySeat brackets.

Move back to the front seat. Start with the two front "smaller" ExtendMySeat brackets, tip your seat back and slide the brackets under the seat. (Note: Do not secure any of the bolts at this time)

STEP 5

Move to the back seat in order to install the larger ExtendMySeat rear bracket. Align the two factory holes and insert factory bolts. Align two ExtendMySeat holes and slightly tighten with the ExtendMySeat bolts provided.

STEP 6

In the front area; lay your factory seat on top of the ExtendMySeat brackets and align seat holes with ExtendMySeat holes. Slightly tighten front two feet with provided ExtendMySeat bolts.

STEP 7

Press seat lever and slide seat to the up most front position. Go to back of seat and secure the remaining four rear bolts.

STEP 7 cont.

STEP 8

Make sure all eight bolts (four factory and four ExtendMySeat) are tight and secure.

STEP 9

Test the seat by sliding it back and forth. You are complete.
