ExtendMySeat Seat-Extender Brackets

Seat-extender brackets by ExtendMySeat are engineered and fabricated in the United States. According to the company, the brackets were created by tall people for tall drivers, providing additional legroom and more comfort for a better driving experience. Currently available for 26 different vehicle solutions including: '08-'12 Toyota Scion Xb, '12 Prius C, (and applications for Toyota's Camry and Venza just announced), '95-'08 Porsche 911, and '10-present Honda CRV models. Laser cut from hefty, single sheet, 10-gauge steel pieces, ExtendMySeat extender brackets instantly offer tall drivers a minimum of 3 to 6 in. of additional legroom.

LED Wheels DUB LEDS

Leading innovators at LED Wheels Inc. and MHT's DUB proudly present what the company describes as the world's most technologically advanced wheel. The patented wheel features an integrated LED display, a weatherproof computer board, a USB port and a power generator, which produce visually interesting and novel results while in motion. Self-powered, easy to install and there's no need for extensive wiring—plug and play in less than 15 minutes.

Genius DVR-FHD590 Vehicle Recorder

Genius is proud to release its DVR-FHD590 full HD vehicle recorder. Company officials state that this dash camera records crisp and clear full HD (1920x1080) video, helping drivers protect themselves with reliable evidence in the case of an unforeseen accident. Operation is stress-free. Just turn on the car and go; the DVR-FHD590 starts recording automatically. In the case of an accident, the G-sensor in the DVR-FHD590 triggers the device automatically to keep a record of the event that cannot be overwritten unless the customer specifically deletes it.
