MORE LEG-ROOM, MORE COMFORT, BETTER DRIVING

Installation for the Honda Civic

1. Remove front seat mount bolts

2. Remove rear seat mount bolt cover, then remove bolts

3. Tilt seat back and unplug electrical connectors.

4. Bolt brackets to bottom of seat using supplied 3/8" bolts, locate brackets to floor and hand thread factory bolts to floor

5. Ensure all bolts are lined up and threads have been started, then tighten.

6. Re install plastic bolt covers, slide seat forward and plug all electrical connectors back in.
